ID:	UC-6
Title:	User looks for individual skill
Description:	The end user would like to find someone to help with a youth project. They would like to narrow down the list of topics to a manageable list by searching a general topic list to get a narrowed down list. They would also like to search the list by alphabet for the first letter in case they are unable to find the topic by general list. This use case will allow both User and Admin to search for skills from any registered user. The classification of Admin is based on permissions assigned at login.
Primary Actor:	Administrator or Public User
Preconditions:	User (or Admin) selects a skill from a list
Postconditions:	The registered Users with associated searched skill list will be successfully displayed

Main Success Scenario:	Search Skill
